GETTING AN EYELIFT TREATMENT – WHAT TO EXPECT

November 30, 2017 7:55 pm

Do you look in the mirror and feel that your outer appearance doesn't match how you feel on the inside? YOU ARE NOT ALONE! In fact, according to the "[Psychology Today](#)", 56% of women are dissatisfied with the way their overall appearance.

The first thing you notice when you meet someone is their eyes, so it makes sense that everyone wants their eyes to remain youthful, unfortunately, that's not always the case.

CAUSES OF AGING EYE APPEARANCE

There are many reasons why our eyes sometimes don't look exactly how we wish. Eyelids that are hooded, drooping, or puffy can be a result of genetics or age and tend to make us look tired, sad, or worried.

For more information about the causes of droopy eyes, read our "[Why We Get Droopy Eyelids, Puffy Eyes, And Other Eye Problems](#)" Blog.

EYELIFT TREATMENT

Getting an [Eyelift](#) (also known as upper blepharoplasty or upper eyelid surgery) can correct the "problems" around the eyes and restore the beautiful contours you had when you were younger, contributing to an all-around refreshed look for your entire face.

Eyelid surgery is performed with twilight sleep sedation. [Drs. Cohen and Swartz](#) will work to customize the treatment plan that works best for your needs.

If you decide to have an eyelift treatment, learn all about optimizing post-op healing by reading our “[Post Eyelid Surgery – Your Self-care Guide and FAQs Answered](#)” Blog. **Our Team** answers the most common FAQs we receive from our patients who have undergone eyelift surgery, including questions on swelling, exercise, makeup, and post-surgery travel.

PATIENT STORIES AND TESTIMONIALS

PATIENT STORY

Meet our patient Youval who had an [upper eyelid laser blepharoplasty to treat drooping eyelids](#). Learn more about Youval’s procedure and see his before and after photos.

PATIENT TESTIMONIAL

UPPER AND LOWER LID EYE SURGERY

I did research before deciding to come to Dr. Cohen. I had read reviews that stated the results of his surgery will look very natural. Now that I’ve had my upper and lower eyes done, I can attest to the fact that they look so much better, but I don’t look like I had plastic surgery. An acquaintance from work saw me after my surgery and said, “You look different. Did you highlight your hair?” I said, “No, it has been highlighted for years.” I’m not telling. I’m just enjoying my new appearance of looking younger and less tired. My eyes also feel less strained at the end of the day. Thank you, Dr. Cohen!
